TRADE CATALOG

You've never owned a mallet like this before.

So why start now?

Because you don't know you need one — until you do.

They're conversation starters, display pieces,
and problem-solvers you didn't know existed.

Once you hold one, you'll wonder how you lived without it.

Woman-owned. Artisan-crafted.

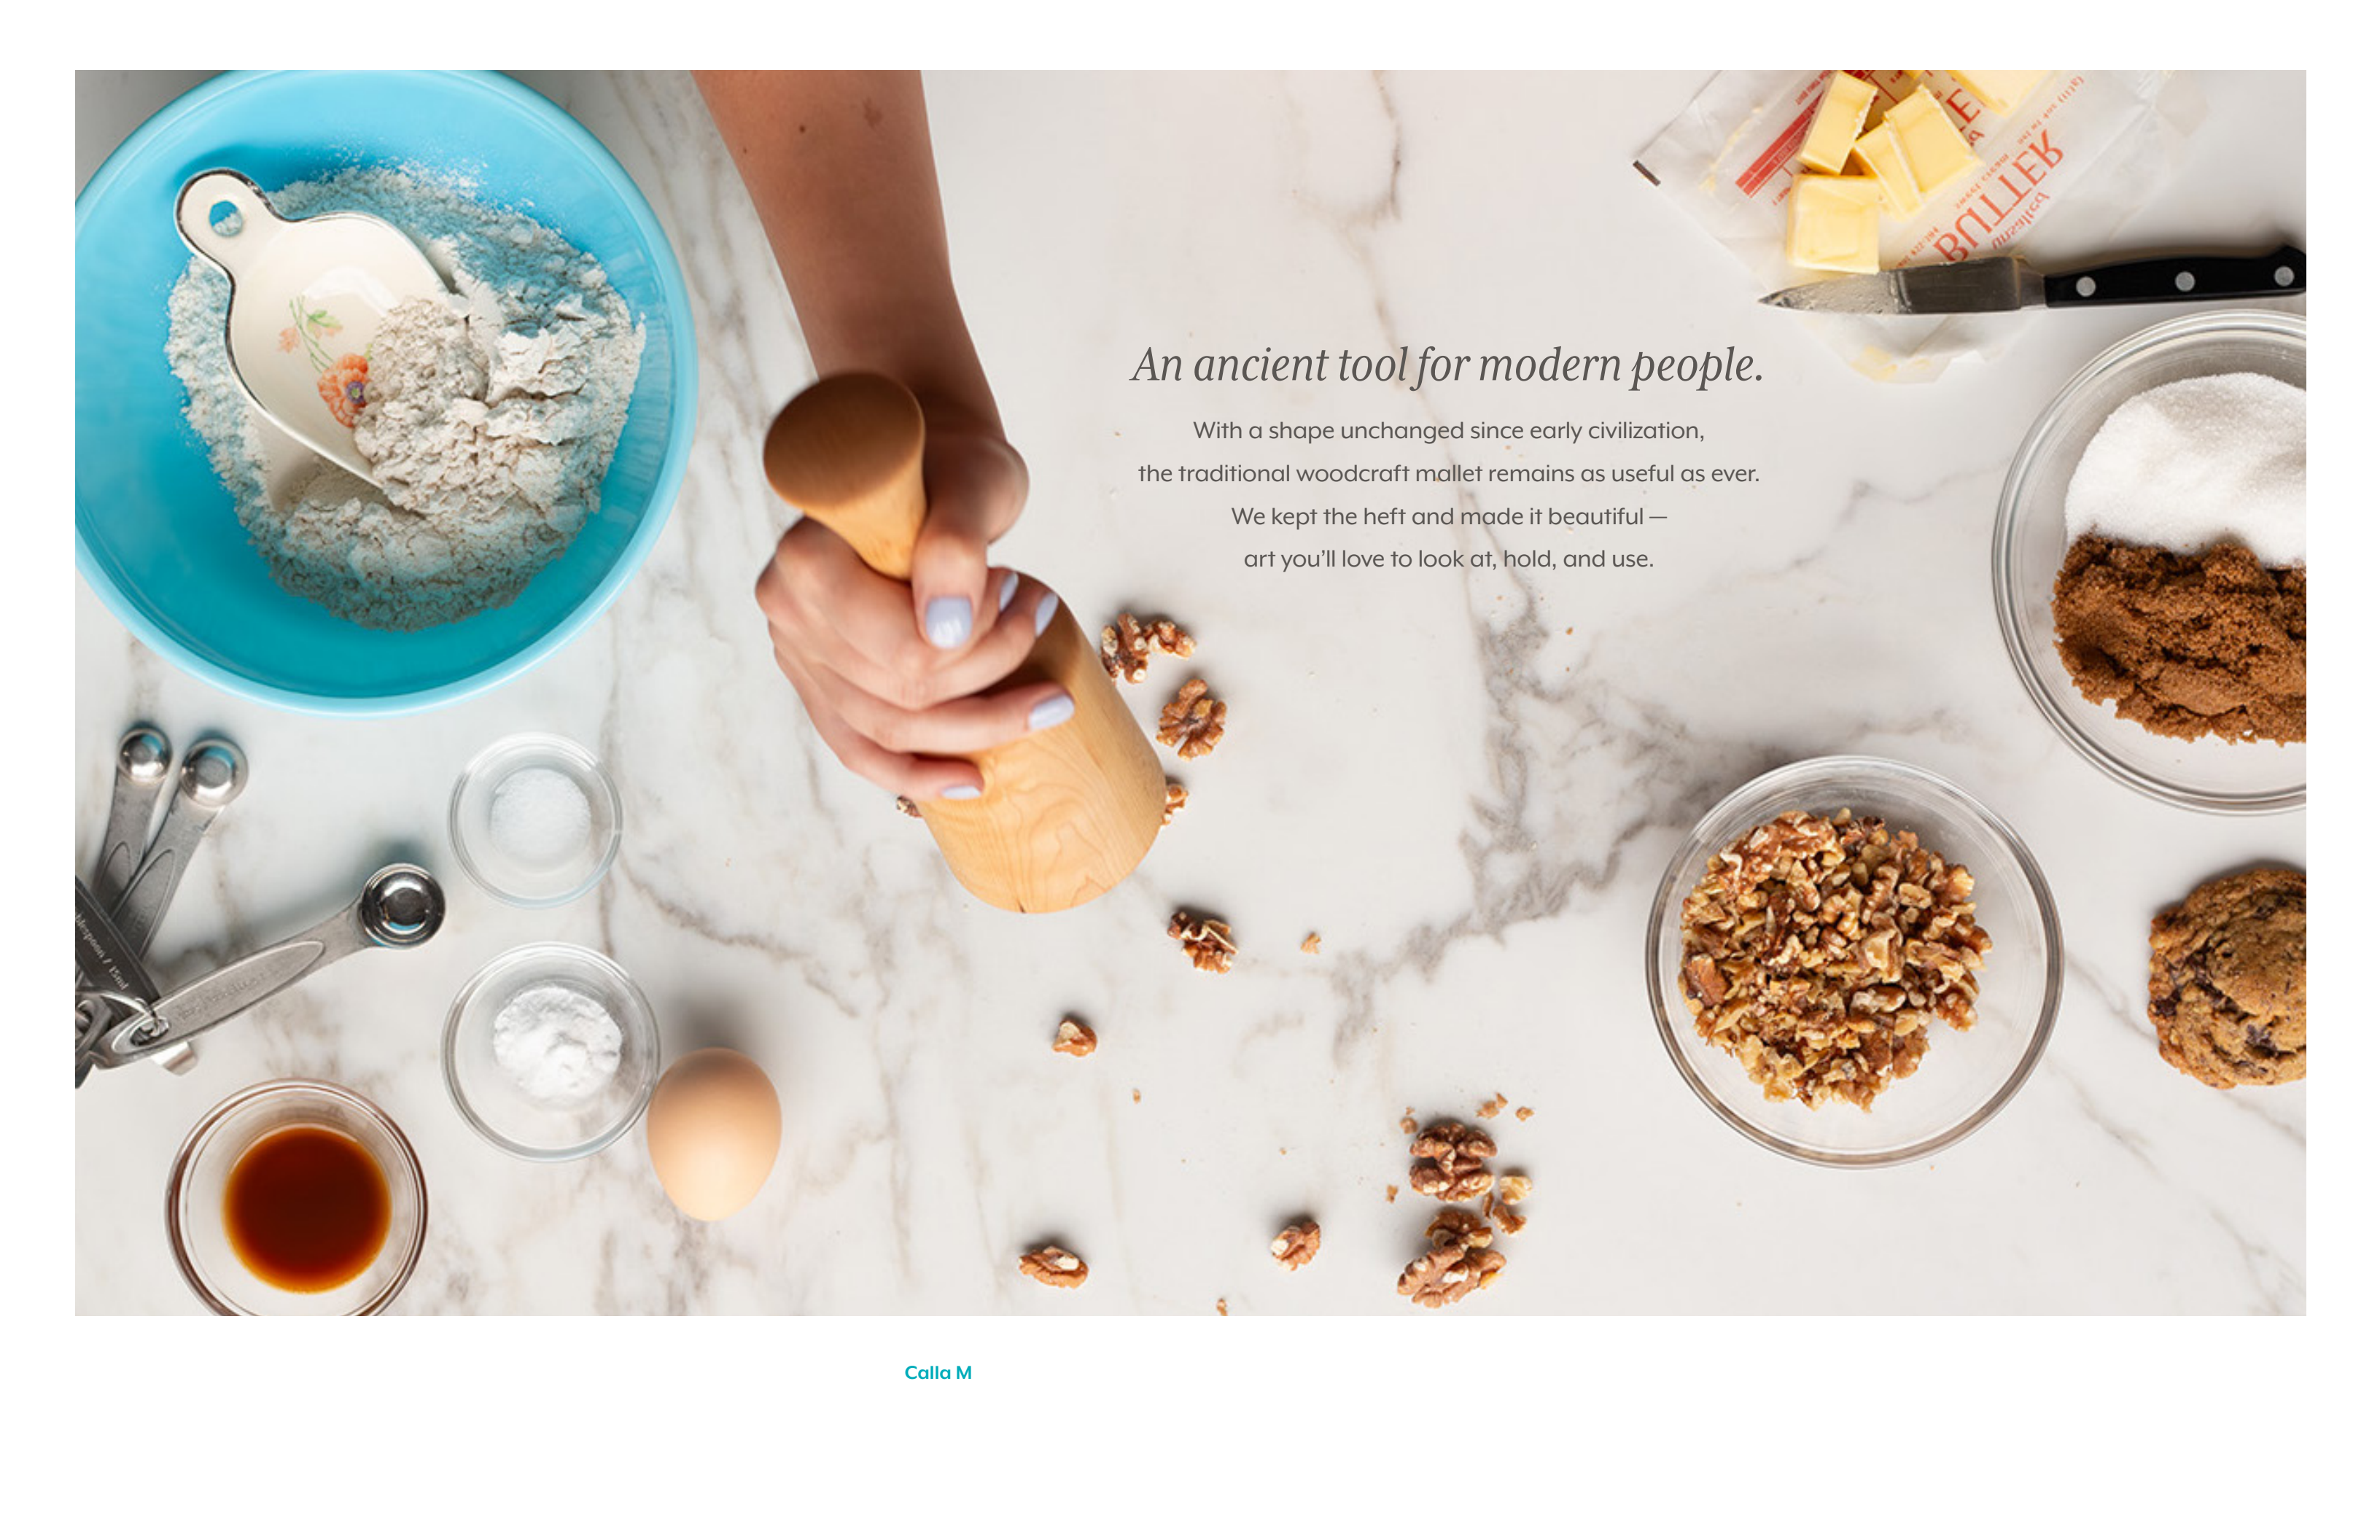

The traditional woodcraft mallet, remade.

Calla L

A top-down view of a person's hand holding a light-colored wooden mallet. The hand has light blue nail polish. The mallet is positioned over a white marble countertop with grey veining. Surrounding the hand are various baking ingredients: a blue bowl with flour and a decorative white scoop, a stick of butter in its wrapper with a knife, a glass bowl with white and brown sugar, a glass bowl with chopped walnuts, a whole brown egg, a small glass bowl with brown liquid, and several small glass bowls with white powders. A pair of metal measuring spoons is also visible. The text is overlaid on the right side of the image.

An ancient tool for modern people.

With a shape unchanged since early civilization,
the traditional woodcraft mallet remains as useful as ever.

We kept the heft and made it beautiful —
art you'll love to look at, hold, and use.

COLLECTIONS

ASTRO

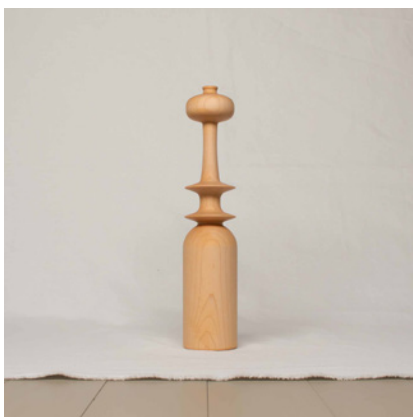

Inspired by a vintage find, Astro’s clipped antenna-like top has a retro-modern look reminiscent of a certain robot from the 1960s series The Jetsons. Due to its straight sides, you can roll out dough. Astro makes a design statement as a stand-alone piece or grouped with its counterparts in any setting.

CALLA

Calla’s well-turned form invites your touch with a design inspired by the sensuous lines of mid-century modern Holmegaard glassware. Use them to craft in any workspace or prepare your culinary favorites in the kitchen—they provide a solid grip for tapping and striking. Their simple forms display beautifully, whether an elegant addition to your batterie de cuisine or a still-life composition on a tabletop.

BUMP

Picture a snake swallowing a coconut, and you'll get the idea behind this simple, eye-catching design. Bump's handle ensures a secure and comfortable grip, and its solid base offers substantial heft for working in wood, craft projects, and culinary endeavors. Leather straps make it easy to hang on S-hooks along a rail system or a simple peg. Wood and leather create an organic, visually appealing artisan tool.

About us

OUR TEAM

Real people behind the scenes

Our small team is passionate about designing and crafting our simple, stylish, and distinctive wood mallets. Feel free to reach out to us anytime at hello@dmalletworks.com. We're always happy to help!

OUR STORY

An everyday object, a favorite thing

The most delicious things happen when you least expect them. I needed to crush a handful of walnuts for cookies, so I grabbed an old woodworking mallet to do the job. I was startled at how effective it was when I needed to whack something (surprisingly often). Plus, the base was great for rolling out dough. My new find quickly became my go-to tool—and everyone else's, too.

*Maybe you've discovered this also—
You create, find, or even buy
something that becomes a favorite object
simply because you like having it around.
You like looking at it;
it's useful, and it brings you joy.*

Years later, I had to make a mallet for a college Fine Arts assignment as an introduction to the lathe. I skipped the mass-produced design we had to copy and designed my own, inspired by Barbara Hepworth's modernist wood sculptures. The result blended art with function—practical, familiar, and beautiful.

Art and usefulness, hand in hand—in your hand.

What's old is new

Mallets have been used in various aspects of life, from food preparation to crafting, since ancient times. I love the connection between art and history with everyday tools, and I believe you will too.

Our values

CRAFTED FOR QUALITY

Mallets that are made from solid hard maple unless otherwise specified. Figure XL and 2XL are made from laminated blanks using food-safe, water-based glue from hard maple offcuts that would otherwise be discarded. This method helps prevent warping and cracking that can sometimes occur with solid wood items.

Crafted to be timeless, our designs marry well with various styles in today's eclectic interiors.

CRAFTED FOR DURABILITY

Buy something well-made a single time, and you'll use it forever. With proper care, you can hand down your mallets to future generations.

CRAFTED IN THE USA

We are committed to supporting our communities through our production processes and sales. We design our collections at our studio in Michigan. Mallets are turned and hand-finished in Pennsylvania, then oil-finished in Rochester, Michigan — and for the Bump collection, leather-strapped by ZEHO Leather Works, a family-run leather shop in Romeo, Michigan we're proud to partner with.

PEOPLE CARE

We donate a percentage of our annual profit to Noah at Central in Detroit, MI, a hub for services and resources for individuals on the path to stable housing.

PLANET CARE

We craft our products using sustainably harvested wood and RMP Finishes® plant-based *Cutting Board Oil* which is 100% food-safe. Our mallets are entirely biodegradable; leather straps are made of environmentally friendly vegetable-tanned leather.

A woodworking tool for the kitchen and home.

WOOD MALLETS WITH THE RIGHT AMOUNT OF HEFT TO GET THE JOB DONE — TRANSFORMING HOW PEOPLE WORK IN THEIR KITCHENS, HOMES, GARDENS, AND WORKSPACES.

A wood mallet is a simple yet effective tool. Freestanding, it has a base that sits solidly on any flat surface. Its handle is easy to grab when you need to whack something — surprisingly often. Wood mallets deliver a softened strike with positive drive, unlike the weighted strike of a hammer mallet.

Which designs should I choose?

Our mallets are designed for cross-use in the kitchen, bar, garden, or workspace. For example, Calla is a wood crafting and culinary workhorse. Base your choice on intended use, hand size, and which silhouette fits your space.

Functional tools that double as decor.

All our collections work equally well on a kitchen countertop, in a tablescape, or displayed on open shelving — sculptural objects that earn their place outside the drawer.

What do people love about them?

People describe our mallets as earthy, grounding, and tactile — with meditative qualities that encourage hands-on engagement. They’re collectible, too — many people find themselves drawn back for another size or shape as they discover new uses and build out their own collection.

How to use your mallets

ELEVATE YOUR TABLE

- Crack shellfish at your dinner party
- Create elegant tablescapes as a decorative piece
- Gently crush herbs to release their oils
- Break nuts and spices for fresh garnishes
- Crack ice with fanfare for cocktails
- Smash cookies and candies for making that perfect dessert
- Crush crackers and croutons, top off your soup or salad

FOR THE HOME & GARDEN

- Display as sculpture, decorative object, or bookend in a tablescape
- Use in the garden for planting and staking
- Craft projects and workshop tasks

Coming Spring 2027

A new milk paint color collection joins the Calla line — a fresh way to bring handcrafted color into the kitchen and home.

Nine shapes. Endless possibilities.

Whether as an elegant addition to your kitchen collection
or a visually appealing arrangement on a shelf, their beautiful forms
complement various styles in today's eclectic interiors.
They make an inspired artisan-crafted statement in any decor.
